Professional Profile

Full-stack developer with 2.5 years of commercial experience building and supporting production web applications in fintech and payments, using C#/.NET, ASP.NET Core, Angular/TypeScript, SQL Server and REST APIs. Currently a Software Development Consultant at Trappist Systems on the Airvoucher payments and remittance platform.

Core Technical Skills

- **Backend:** C#, .NET / ASP.NET Core, REST APIs, Entity Framework Core, authentication, Python
- **Frontend:** Angular, TypeScript, JavaScript, React / Next.js (project work), HTML, CSS, responsive UI
- **Data:** SQL Server, Azure SQL, PostgreSQL, SQLite, relational data modelling, query tuning
- **Cloud & DevOps:** Microsoft Azure (App Service, Azure SQL), Git, GitHub Actions, CI/CD, Docker, Postman
- **Practice:** Agile/Scrum, production debugging, defect reproduction, QA across environments, code review, technical documentation

Professional Experience

Software Development Consultant | Trappist Systems | Oct 2025 - Present

- Deliver changes on Airvoucher, a payments and remittance platform: investigate defects and data discrepancies across QA and production, and support live transaction workflows.
- Translate operational requirements into scoped software changes, then implement, test and verify them across environments.

- Contributed to AutoVisa, an AI-assisted application workflow, and improved responsive UI for client site The Gal in the Middle.

Junior Software Developer | TradeShield | May 2024 – Jun 2025

- Built and maintained full-stack fintech applications with C#, ASP.NET Core, Entity Framework, Angular, TypeScript and SQL Server.
- Built and consumed REST APIs, investigated production incidents, fixed defects and improved SQL query performance.
- Worked in an Agile team using Git, pull requests and code review in a credit-risk context.

Data Analytics Winter Intern | Scrummy | May 2026

- Cleaned, transformed and analysed rugby performance data with Python, pandas, NumPy, SQL and APIs, and presented findings with visualisations.

Selected Projects

Property Listing Platform | Angular, ASP.NET Core, SQL, Azure | 2024 – 2026

- Full-stack property platform with authentication, search, REST APIs and business workflows; deployed on Azure with EF Core migrations and CI/CD via GitHub Actions.

Job Application Agent | Python, SQLite | 2026

- Local-first tool that ingests job adverts, scores candidate fit and produces auditable outputs, with validation, automated tests and a dashboard.

Education

BSc Engineering (Mechanical) | University of the Witwatersrand | Expected June 2027

- Three modules outstanding, completed alongside full-time work. Research project: semantic segmentation for autonomous vehicles (Python, computer vision).

Additional Experience

Junior Mechanical Engineer | HiNova | Oct 2023 – Feb 2024 – Mechanical/HVAC design support, diagnostics and technical documentation.

Academic Editor | Cactus Communications | Jan 2022 - Dec 2023 - Edited engineering and scientific manuscripts for clarity and accuracy.
